DAVID B. RAUSCH
Director

July 18, 2022

Ladies and Gentlemen:

I am pleased to present to you the 2021 Crime in Tennessee annual report. The Tennessee Bureau of Investigation's CJIS Support Center, compiles and publishes this report based upon crime statistics submitted by all law enforcement agencies across the state. The agencies report crimes to the Tennessee Incident Based Reporting System (TIBRS), which is the state's version of the FBI's National Incident Based Reporting System (NIBRS).

Incident-based reporting views a crime and all its components as an "incident." Information about the crime, including details of the offense, victim, offender, property, arrestees, and the relationship between the people involved, are all reported.

The TIBRS program continues to serve as a model for the nation and remains successful because of the continued cooperation by Tennessee's law enforcement community. The TBI provides TIBRS training to commissioned and non-commissioned law enforcement personnel across the state. TBI remains committed to this effort and will continue to provide the training and technical assistance necessary to collect the most accurate and comprehensive crime statistics for Tennessee and its citizens.

As always, we strongly discourage ranking of law enforcement agencies according to the statistics. There are too many demographic, socio-economic and other factors out of the control of law enforcement that contribute to the nature of the crimes committed. Crime varies from place to place and ranking the agencies based solely on numbers would neither be fair to the agencies nor their communities.

I would like to thank all participating law enforcement agencies for their hard work and contributions to making this report a thorough and accurate picture of crime in Tennessee. It is only with their support that our state continues to maintain such a successful program.

Sincerely,

David Rausch
Director

TIBRS

What is incident based reporting?

Incident based reporting views a crime and all of its components as an “incident”. In order to obtain important information, facts recorded and preserved about the incident are organized into specific categories or segments. The vehicle used for recording these facts is a “data element”. Data elements provide information about crime and its involvement with victims, offenders, property, arrestees, etc.

What is TIBRS?

The Tennessee Incident Based Reporting System (TIBRS) program is an incident-based reporting system designed to collect information on every single crime occurrence and on each offense and arrest within the occurrence. The most significant difference between TIBRS and traditional Uniform Crime Reporting (UCR) system is the degree of detail in reporting. TIBRS collects information on 24 crime categories made up of 54 specific offenses (Group A Offenses) compared to the UCR Summary reporting system that collects only eight Part 1 Offenses. Additionally, arrests are reported for 10 Group B offense categories in TIBRS. Under the UCR Summary system, only the most serious offense was reported. In TIBRS up to 10 offenses can be reported within the same incident and each offense is counted as a crime. Because of the differences between UCR summary data and TIBRS data, any cross comparisons would provide inaccurate results in trend analysis. As of January 1, 2021 the UCR system was retired and the FBI switched to NIBRS.

Pitfalls of Ranking

In the past, crime data has been used to compile rankings of individual jurisdictions and institutions of higher learning. These crude and/or incomplete analyses have often created misleading perceptions which adversely affect geographic entities and their residents. The FBI has a long-standing policy against ranking cities, counties, states and universities/colleges on the basis of crime data alone and the TBI concurs.

Locals should not be ranked because there are many factors that cause the nature and type of crime to vary from place to place. TIBRS statistics include only jurisdictional figures along with reported crime, clearance or arrest data. Rankings ignore the uniqueness of each locale. Per the FBI, all jurisdictions are affected in some degree by:

- Population density and degree of urbanization of the locality and surrounding area;
- Variations in composition of the population;
- Number of residents vs. the “policing population” i.e., residents plus daily commuters, transients, tourists, shoppers, etc.;
- Economic conditions;
- Modes of transportation and highway systems;
- Cultural conditions;
- Family conditions with respect to divorce and family cohesiveness;
- Climate;
- Effective strength of law enforcement;
- Administrative and investigative emphases of law enforcement; and/or

- Policies of other components of the criminal justice system, i.e., prosecutorial, judicial, correctional, and probational.

The attitudes of a jurisdiction's citizenry toward crime and the crime reporting practices of its residents are known to have an effect on the number of crimes coming to the attention of law enforcement. [1]

Because of concerns regarding the proper use of TIBRS data, the TBI has the following policies:

- The TBI will not analyze, interpret, or publish crime statistics based solely on a single dimension of interagency ranking;
- The TBI will not furnish agency-based crime statistics to data users in a ranked format; and
- When providing/using agency-oriented statistics, the TBI cautions and, in fact, strongly discourages data users against using rankings to evaluate locales or the effectiveness of their law enforcement departments.

Crime Rates

Crime rates in both Crime in Tennessee and the FBI's Crime in the United States reflect all 24 Group A Offense Categories. The purpose of this publication is to make the data more clear than the overall FBI survey of crime. Please be aware, the data included in this publication is raw numbers and not the crime rates. In order to assist in determining crime rates for given offenses, the following formula may be used:

$$\text{Crime Rate} = \frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Population Estimates

The population data is from the 2021 state population estimate.

Trends

We strongly discourage attempting to compare the TIBRS data for 2021 to any data previously released by the FBI in the Crime in the United States publications. The data sets are not comparable due to the number of types of crimes reported and that all offenses in an incident are reported in TIBRS. Trend information for the state is included in the statewide section of the report.

Crime Counts

All crimes reported in Crime in Tennessee are based upon crimes that occurred in 2021. If a person was arrested in 2021 for a crime that occurred in a previous year, the arrest statistics will not be included in the 2021 counts.

Note: This report is based upon data submitted as of July 1, 2022. As agencies update their 2021 data, the changes will be reflected at https://crimeinsight.tbi.tn.gov/. Although changes will be reflected on the site, this publication will not be updated.

Who Reports?

All law enforcement agencies, as well as colleges and universities, are mandated under Tennessee law to report crime statistics weekly to the Tennessee Bureau of Investigation.

At the time of this report's release, zero law enforcement agencies failed to be in compliance with reporting requirements and were listed as decertified.

Pandemic Impact

With the COVID pandemic came closures of work places, schools, daycares, extracurricular activities, church services and many other community-based social venues. While the difference between 2020 and 2021 data is not as pronounced as the year before, pandemic-based restrictions still seem to indicate a notable impact on reported crime.

Crime in Tennessee 2021

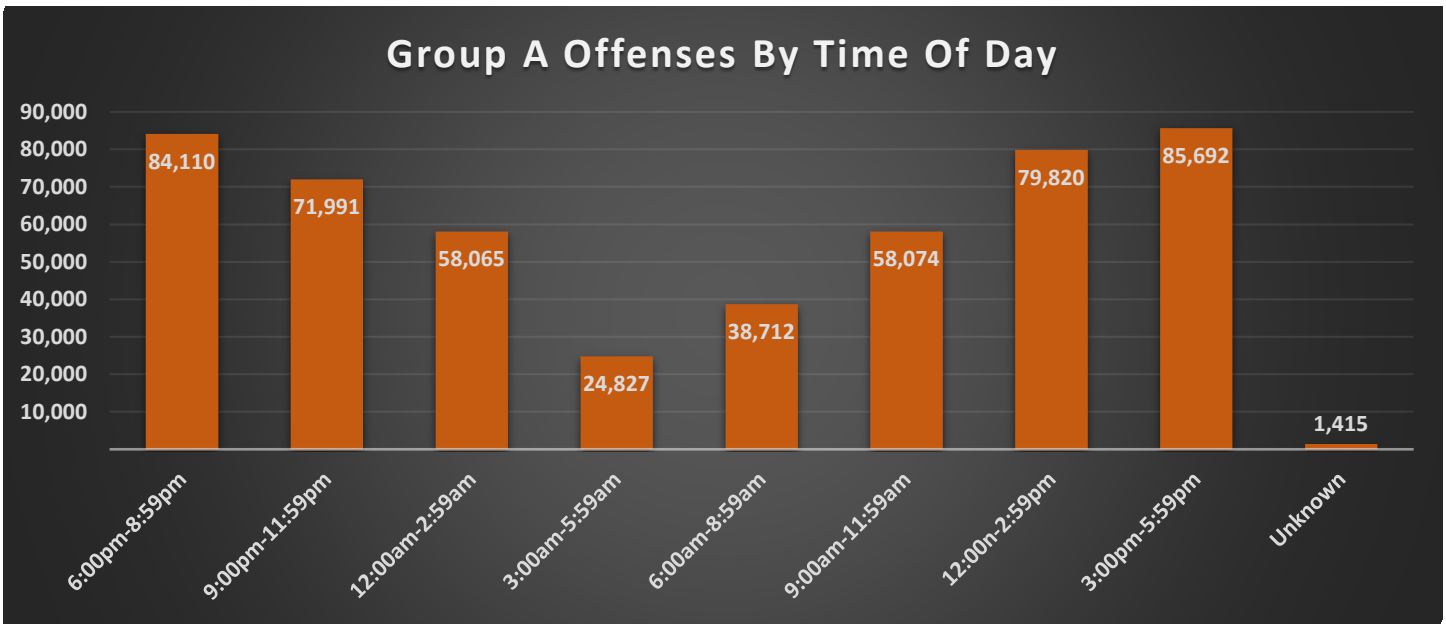

(*) Offenses are counted using the FBI Units of Count for Crime

(**) The 'Arrests' column shows arrests made for incidents during the selected period, regardless of arrest date. Arrest counts for the same period may change over time.

Group A Summary:

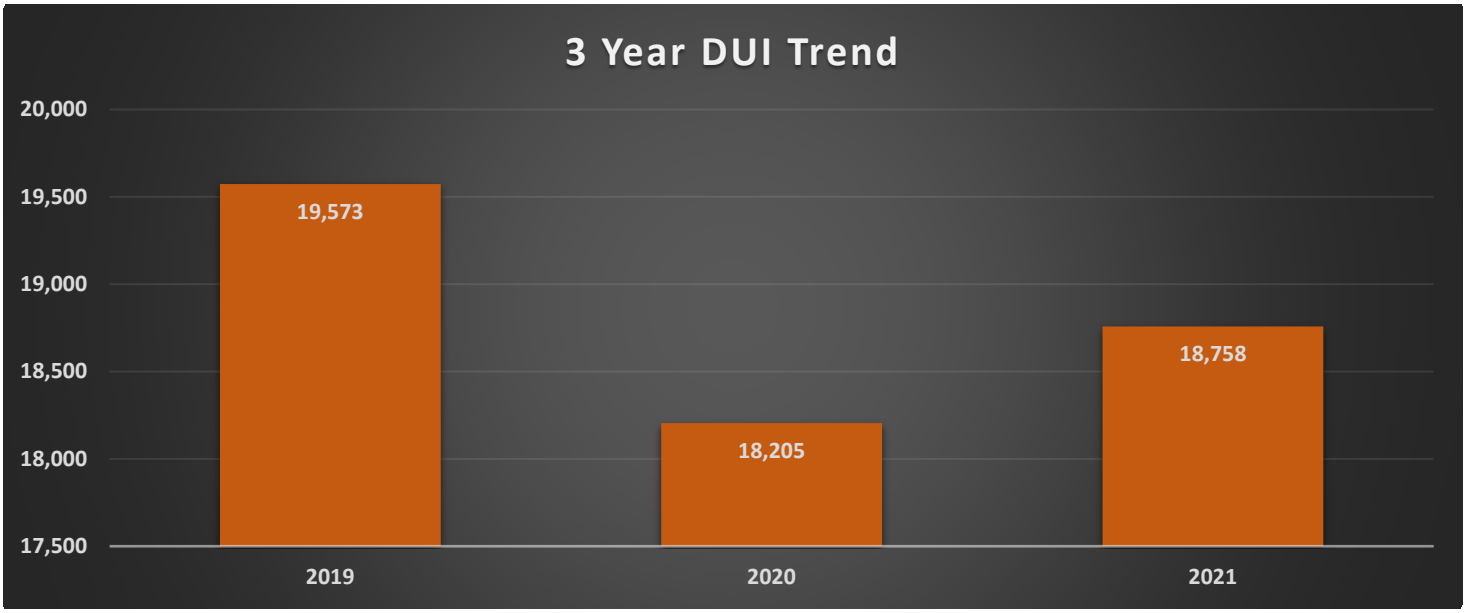

In 2021, the month with the most Group A offenses reported was July, with 45,550, or 9.06% of the yearly total. Closely following July is May with 44,835 Group A offenses reported, or 8.91% of the yearly reports.

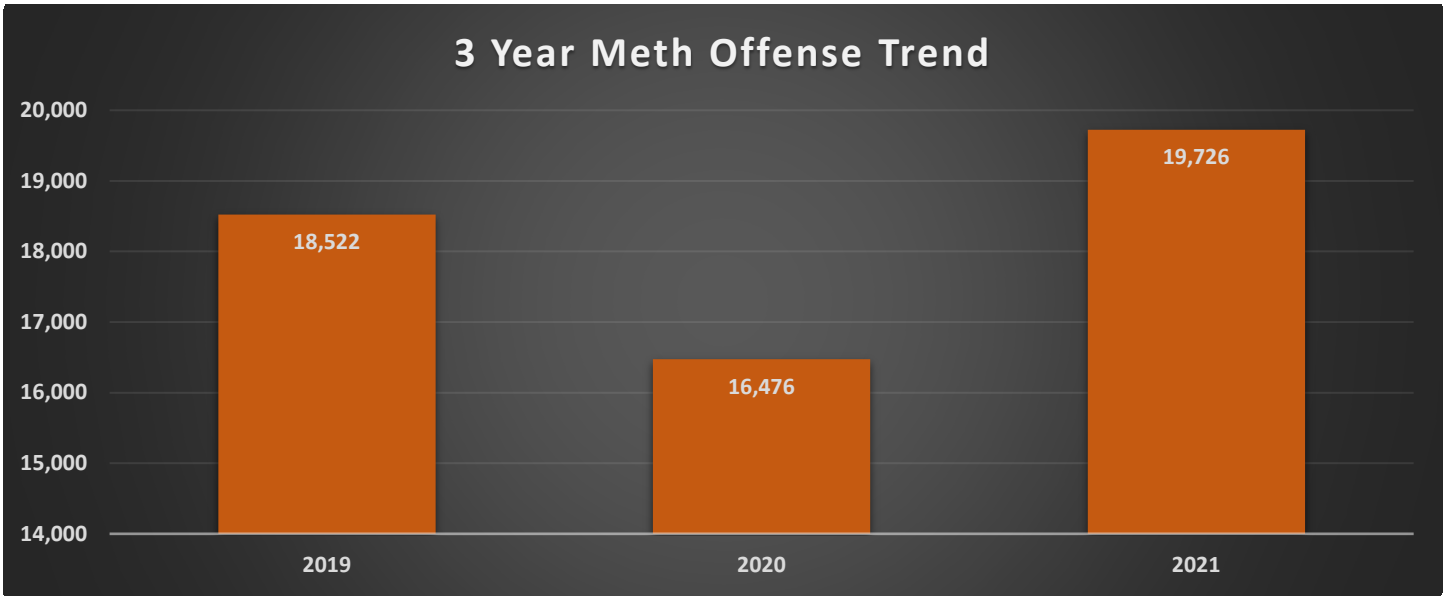

One piece of data collected by the TIBRS program is what time of day a Group A offense is reported to have happened. In 2021, the most common time of day for an offense to occur was between 3pm and 5:59pm, accounting for 17.05% percent of reports. Following that time frame, 6pm to 8:59pm made up 16.73%.

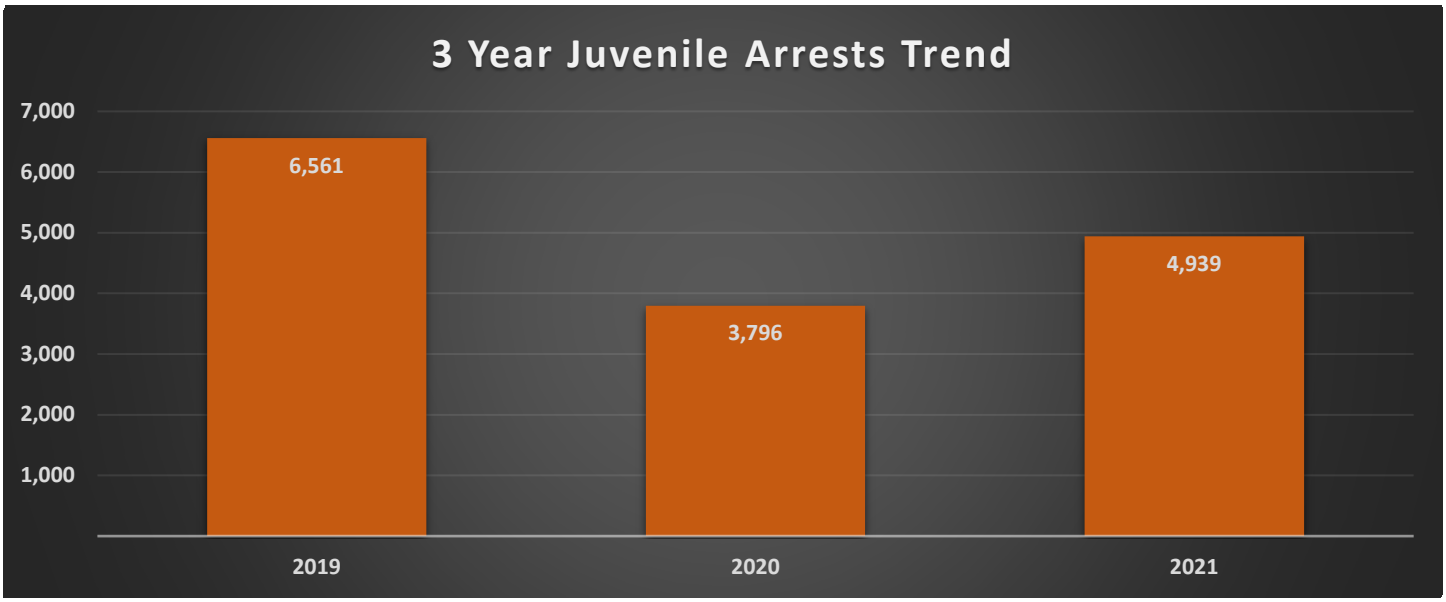

Three-Year Arrest Trends

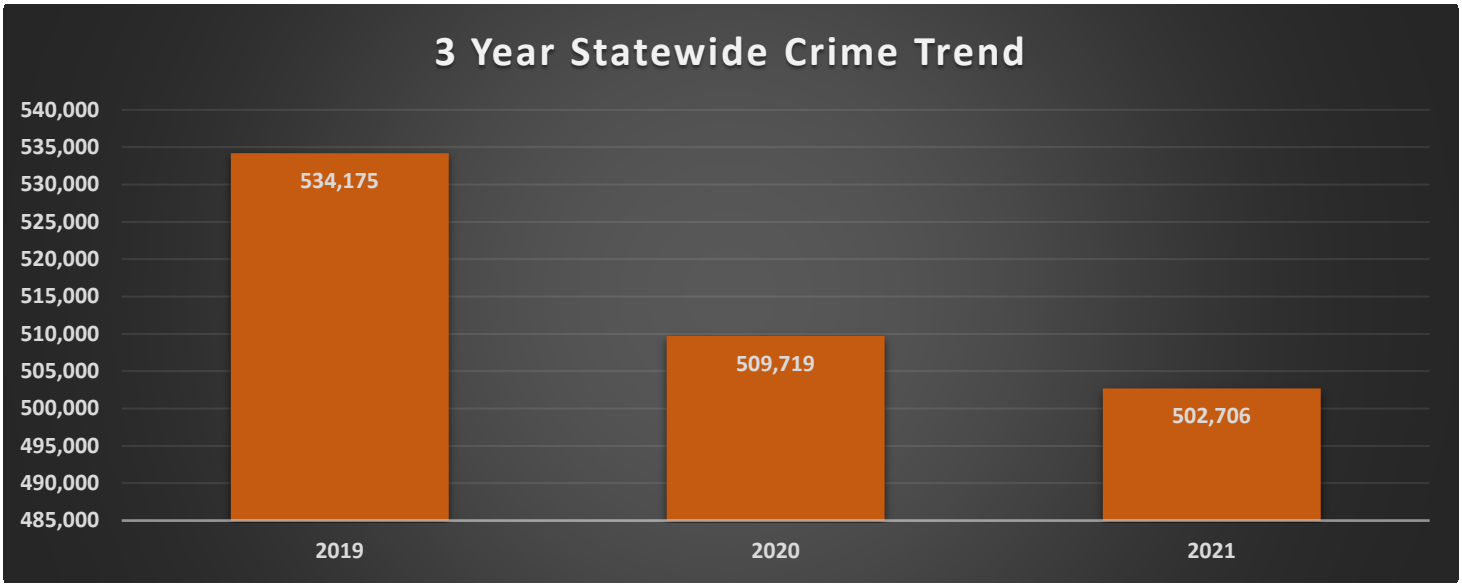

2021 showed a bit of a rise in the number of DUI arrests, increasing by 3.04%, however even with this increase, the number of arrests rising from 2020, DUI arrests remain 4.34% lower than pre-pandemic 2019 numbers.

Meth offenses saw a very noticeable rise in 2021, increasing 19.73%. This increase puts the number of reported meth offenses even higher than those reported in 2019 by a margin of 6.5%.

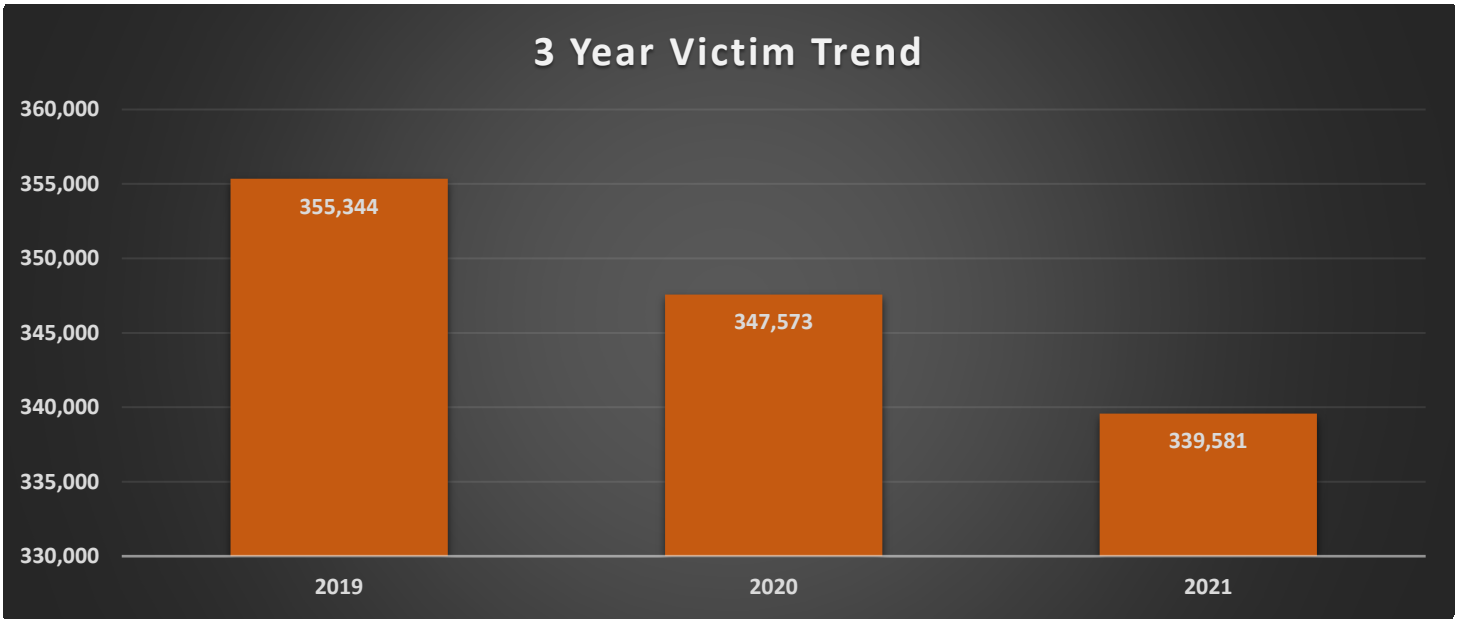

The rate in which juvenile arrests occurred in 2021 showed a 30.11% increase from those reported in 2020. However, this still presented a 24.72% decrease from the pre-pandemic numbers in 2019.

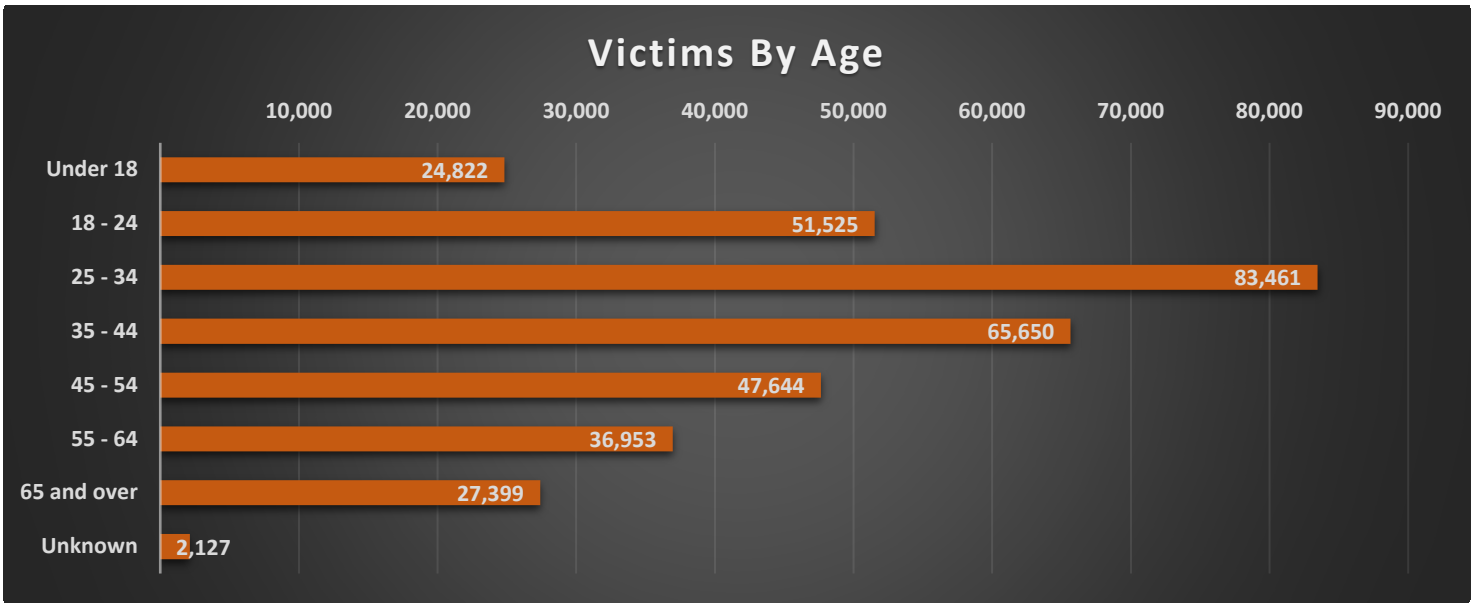

Despite certain areas of reported crime increasing, 2021 continued the usual, if only marginal, decrease in overall crime, dropping 1.38% from 2020. While not a particularly large decrease, this is consistent with a running nationwide trend of a decrease in overall crime.

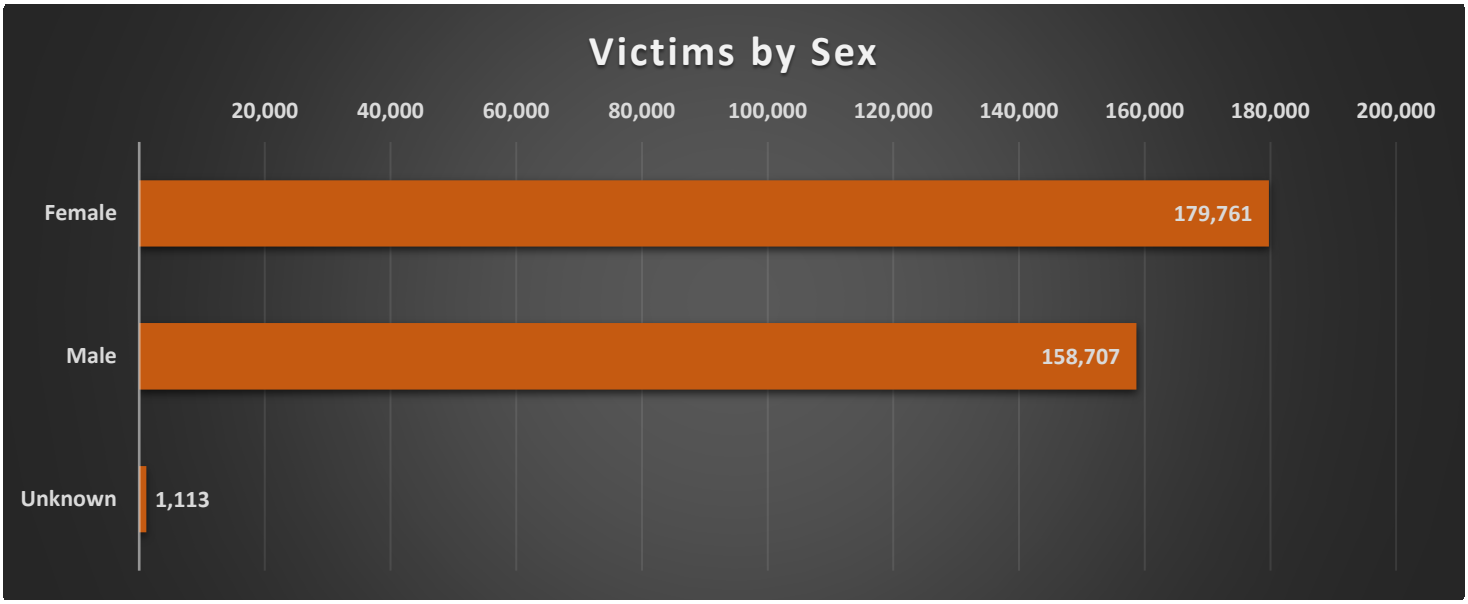

Victim Data:

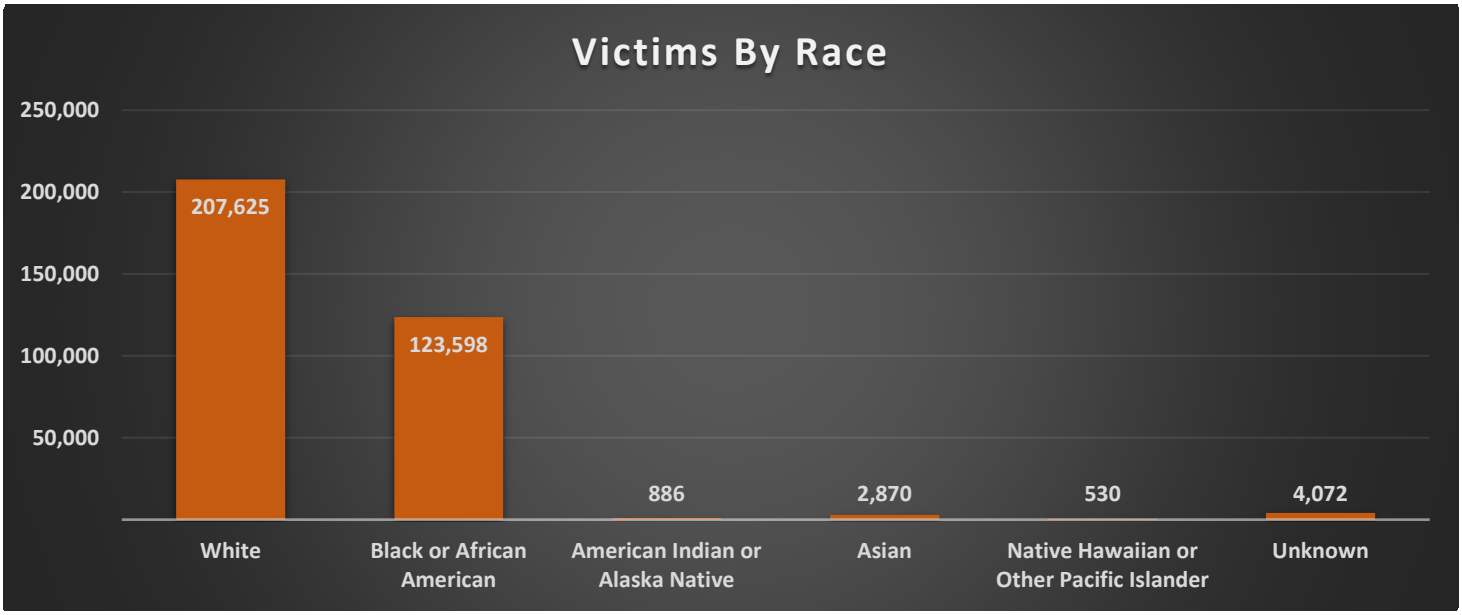

The number of reported victims in Group A offenses fell 2.3% between 2020 and 2021 which is quite similar to the 2.19% decrease between 2019 and 2020. Despite the drop in overall reported victims, the most frequently associated crime, Simple Assault, slightly increased by 1.31%.

Looking at ages of victims of offenses, the most commonly reported age group is 25-34, comprising 23.99% of reported victims. The second most common age bracket is 35-44, making up 19.33% of reports.

When examining the reports of victims on the basis of sex, both Males and Females made up similar segments of reports, with Females comprising 52.94% of reports, Males making up 46.74%, and the remainder being reported as unknown.

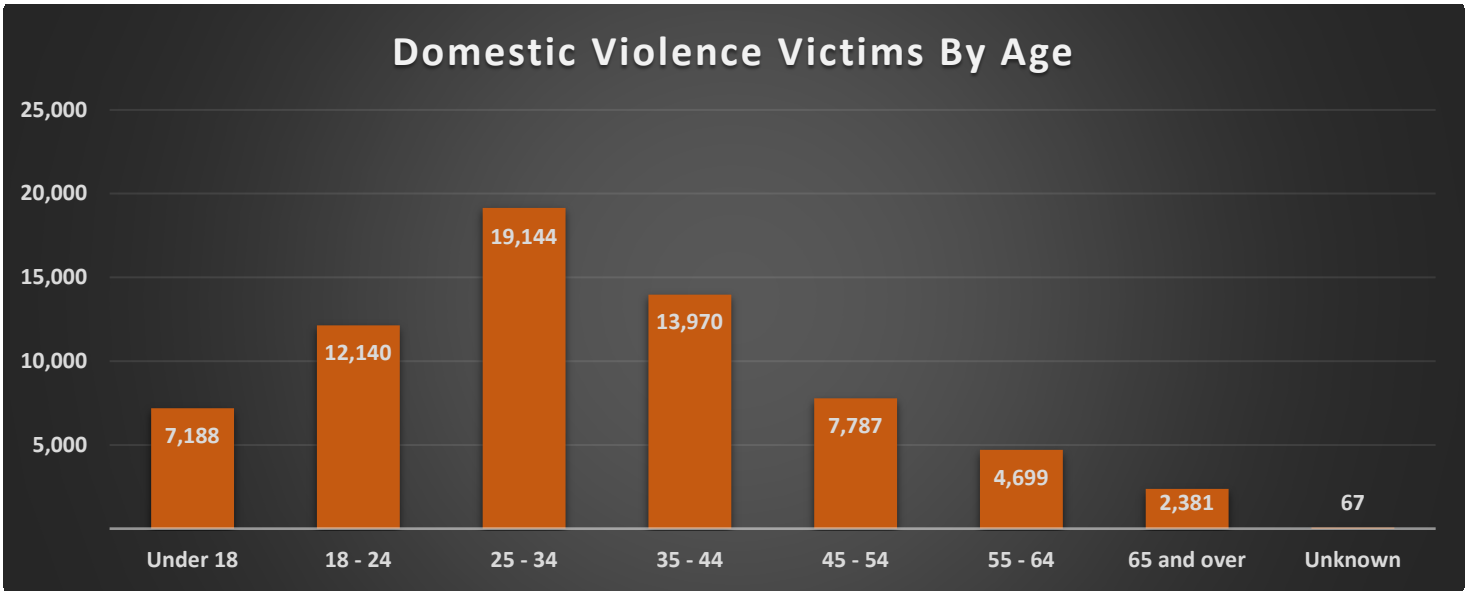

By looking at reported victims by race, it can be seen that victims categorized as White are most common, comprising 61.14% of reported victims, followed by Black/African American, making up 36.4% of reports. The remaining 2.46% is split among American Indians/Alaska Natives, Asians, Native Hawaiians/Other Pacific Islanders, and those of Unknown race.

Domestic Violence:

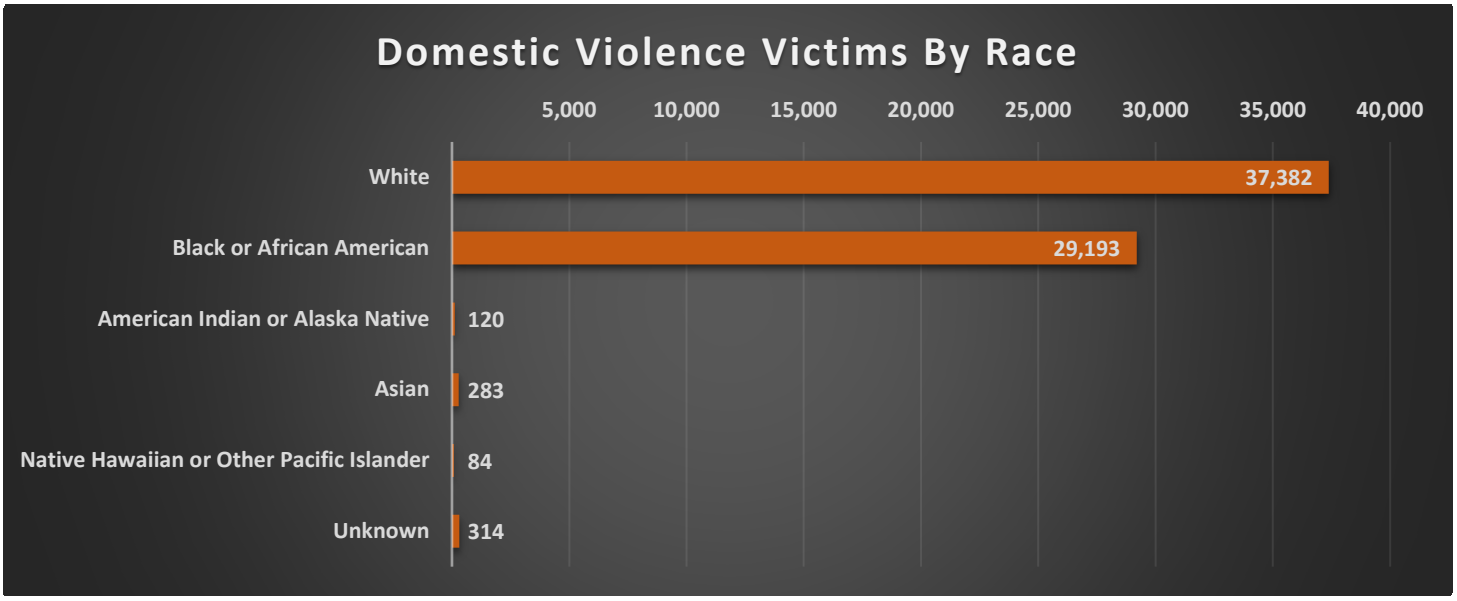

Domestic Violence offenses include types of assault that have a victim-to-offender relationship that is domestic, including: spouse, ex-spouse, common-law spouse, boyfriend/girlfriend, child, step-child, grandchild, sibling, stepsibling, parent, step-parent, grandparent, in-law, and other family members.

Domestic Violence victims were reported to have been overwhelmingly Female, comprising over two-thirds (71.81%) of incidents, with 28.12% reported as male. The remaining .07% was reported with the victim's sex being unknown.

When breaking down Domestic Violence victims by age, their distribution falls in line with the general breakdown of victims of Group A offenses. The most common age range once again is 25-34, comprising of 28.41% of reports, followed by 35-44, which makes up 20.73%.

A review of data of Domestic Violence victims by race shows, that much like age distribution, the break down remains more or less consistent with general victims of Group A offenses. Victims categorized as White make up 55.48% of Domestic Violence reports. Black victims account for 43.33% of reported Domestic Violence victims.
