DRAWING INFORMATION

TWRA’s drawing program assigns each application a unique random number. Once the drawing begins, the lowest random number is selected first for review, then each subsequent number is selected for review. When an application is selected for review, the first hunt choice is compared to the remaining quota for that hunt; if there is quota available, the application is awarded that hunt choice. If not, the program examines each subsequent hunt choice, in the order selected on the application, until it finds a hunt choice with quota available or runs out of hunt choices. If no quota is available for any hunt choices on the application, then the application is unsuccessful. If one member of a party is drawn for a hunt, then the entire party is drawn.

There are no priority points associated with this quota hunt.
